

Altra Lite Applicator

The Altra Lite Applicator covers all of your cleaning, disinfecting, and finishing requirements. The easy change out cartridges make switching products simple, clean and efficient. Snap the applicator bottle into the cradle and you are ready to go.

Standard procedure suggests mopping in a figure-8 circular motion, overlapping on each pass. Other floor applicators are designed to mop in a linear pattern, causing tendinitis and other injuries. The Altra Lite Applicator is designed to be used in the recommended figure-8 pattern. Its ergonomic design reduces worker fatigue. The Infinity twist handle properly distributes weight and promotes major muscle group actuation to reduce strain on wrists, knees and back.

**Ergonomic
design**

**Multiple product
applications**

**Promotes speed
and efficiency**

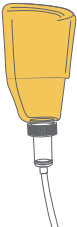

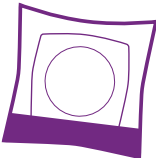

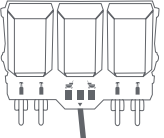

Infinity twist handle

Switch products easily by changing out cartridges
